

TRAC Vegetation Management

VEGETATION MANAGEMENT PROJECTS

SERVICES

TRAC Vegetation Management has delivered projects for large scale vegetation clearance of flail strips and sidings which has meant that we work to a specification provided by the client and then deliver on time and to the highest standards.

This often entails liaising with third party landowners to enable access to the rail infrastructure to remove timber and provide access for machines and field teams.

PRE-WORKS SURVEY

Full site survey prior to work commencing to identify:

- Presence of cables
- Suitable access points/routes to site
- Types of protection methods to be used
- Locations for welfare units
- Storage areas
- Ecological factors

ECOLOGY

- Bird nesting
- Badger sets
- Noxious weeds
- Dangerous/harmful plants
- Exclusion zones to be set up
- Daily ecological surveys
- Ecologist to be engaged to undertake assessments, provide advice and apply for any licences that may be required.

REPORTING/AUDITING

- Daily end shift reports
- Weekly progress reports
- Weekly meetings (if required)
- Regular site audits
- Toolbox Talks
- Before/after photographs

COMPLETION

- Full walk through of site with TRAC Supervisor/TRAC Project Manager
- Appendix D completed & submitted to client
- Site visit with client
- Any snagging items identified and acted upon
- Project sign-off
